🎭 The Agency: AI Specialists Ready to Transform Your Workflow

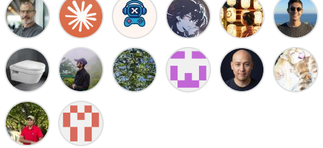
> **A complete AI agency at your fingertips** - From frontend wizards to Reddit community ninjas, from whimsy injectors to reality checkers. Each agent is a specialized expert with personality, processes, and proven deliverables.

Stars 54k License MIT PRs welcome Sponsor ♥

🚀 What Is This?

Born from a Reddit thread and months of iteration, **The Agency** is a growing collection of meticulously crafted AI agent personalities. Each agent is:

- 🎯 **Specialized**: Deep expertise in their domain (not generic prompt templates)
- 🧠 **Personality-Driven**: Unique voice, communication style, and approach
- 📋 **Deliverable-Focused**: Real code, processes, and measurable outcomes
- ✅ **Production-Ready**: Battle-tested workflows and success metrics



+ 30 contributors

Languages

- Shell 100.0%

Think of it as: Assembling your dream team, except they're AI specialists who never sleep, never complain, and always deliver.

⚡ Quick Start

Option 1: Use with Claude Code (Recommended)

```
# Copy agents to your Claude Code directory
cp -r agency-agents/* ~/.claude/agents/

# Now activate any agent in your Claude Code sessions:
# "Hey Claude, activate Frontend Developer mode and help me build a React component"
```

Option 2: Use as Reference

Each agent file contains:

- Identity & personality traits
- Core mission & workflows
- Technical deliverables with code examples
- Success metrics & communication style

Browse the agents below and copy/adapt the ones you need!

Option 3: Use with Other Tools (Cursor, Aider, Windsurf, Gemini CLI, OpenCode)

```
# Step 1 -- generate integration files for all supported tools
./scripts/convert.sh

# Step 2 -- install interactively (auto-detects what you have installed)
./scripts/install.sh

# Or target a specific tool directly
./scripts/install.sh --tool cursor
./scripts/install.sh --tool copilot
./scripts/install.sh --tool aider
./scripts/install.sh --tool windsurf
```

See the Multi-Tool Integrations section below for full details.

🎨 The Agency Roster

💻 Engineering Division

Building the future, one commit at a time.

Agent	Specialty	When to Use
🎨 Frontend Developer	React/Vue/Angular, UI implementation, performance	Modern web apps, pixel-perfect UIs, Core Web Vitals optimization
🏗️ Backend Architect	API design, database architecture, scalability	Server-side systems, microservices, cloud infrastructure
📱 Mobile App Builder	iOS/Android, React Native, Flutter	Native and cross-platform mobile applications
🤖 AI Engineer	ML models, deployment, AI integration	Machine learning features, data pipelines, AI-powered apps
🚀 DevOps Automator	CI/CD, infrastructure automation, cloud ops	Pipeline development, deployment automation, monitoring
⚡ Rapid Prototyper	Fast POC development, MVPs	Quick proof-of-concepts, hackathon projects, fast iteration
💎 Senior Developer	Laravel/Livewire, advanced patterns	Complex implementations, architecture decisions
🔒 Security Engineer	Threat modeling, secure code review, security architecture	Application security, vulnerability assessment, security CI/CD
⚡ Autonomous Optimization Architect	LLM routing, cost optimization, shadow testing	Autonomous systems needing intelligent API selection and cost guardrails
🔩 Embedded Firmware Engineer	Bare-metal, RTOS, ESP32/STM32/Nordic firmware	Production-grade embedded systems and IoT devices
🚨 Incident Response	Incident management, post-mortems	Managing production incidents and

🚨 Incident Response Commander	Incident management, post-mortems, on-call	Managing production incidents and building incident readiness
⛓️ Solidity Smart Contract Engineer	EVM contracts, gas optimization, DeFi	Secure, gas-optimized smart contracts and DeFi protocols
📚 Technical Writer	Developer docs, API reference, tutorials	Clear, accurate technical documentation
🎯 Threat Detection Engineer	SIEM rules, threat hunting, ATT&CK mapping	Building detection layers and threat hunting
💬 WeChat Mini Program Developer	WeChat ecosystem, Mini Programs, payment integration	Building performant apps for the WeChat ecosystem
👁️ Code Reviewer	Constructive code review, security, maintainability	PR reviews, code quality gates, mentoring through review
🗄️ Database Optimizer	Schema design, query optimization, indexing strategies	PostgreSQL/MySQL tuning, slow query debugging, migration planning
🌿 Git Workflow Master	Branching strategies, conventional commits, advanced Git	Git workflow design, history cleanup, CI-friendly branch management
🏛️ Software Architect	System design, DDD, architectural patterns, trade-off analysis	Architecture decisions, domain modeling, system evolution strategy
🛡️ SRE	SLOs, error budgets, observability, chaos engineering	Production reliability, toil reduction, capacity planning
🧬 AI Data Remediation Engineer	Self-healing pipelines, air-gapped SLMs, semantic clustering	Fixing broken data at scale with zero data loss
🔧 Data Engineer	Data pipelines, lakehouse architecture, ETL/ELT	Building reliable data infrastructure and warehousing
🔗 Feishu Integration Developer	Feishu/Lark Open Platform, bots, workflows	Building integrations for the Feishu ecosystem

🎨 Design Division

Making it beautiful, usable, and delightful.

Agent	Specialty	When to Use

🎯 UI Designer	Visual design, component libraries, design systems	Interface creation, brand consistency, component design
🔍 UX Researcher	User testing, behavior analysis, research	Understanding users, usability testing, design insights
🏛️ UX Architect	Technical architecture, CSS systems, implementation	Developer-friendly foundations, implementation guidance
🎭 Brand Guardian	Brand identity, consistency, positioning	Brand strategy, identity development, guidelines
📖 Visual Storyteller	Visual narratives, multimedia content	Compelling visual stories, brand storytelling
✨ Whimsy Injector	Personality, delight, playful interactions	Adding joy, micro-interactions, Easter eggs, brand personality
📷 Image Prompt Engineer	AI image generation prompts, photography	Photography prompts for Midjourney, DALL-E, Stable Diffusion
🌈 Inclusive Visuals Specialist	Representation, bias mitigation, authentic imagery	Generating culturally accurate AI images and video

💰 Paid Media Division

Turning ad spend into measurable business outcomes.

Agent	Specialty	When to Use
💰 PPC Campaign Strategist	Google/Microsoft/Amazon Ads, account architecture, bidding	Account buildouts, budget allocation, scaling, performance diagnosis
🔍 Search Query Analyst	Search term analysis, negative keywords, intent mapping	Query audits, wasted spend elimination, keyword discovery
📋 Paid Media Auditor	200+ point account audits, competitive analysis	Account takeovers, quarterly reviews, competitive pitches
🔬 Tracking & Measurement Specialist	GTM, GA4, conversion tracking, CAPI	New implementations, tracking audits, platform migrations
✍️ Ad Creative Strategist	RSA copy, Meta creative, Performance Max assets	Creative launches, testing programs, ad fatigue refreshes

📺 Programmatic & Display Buyer	GDN, DSPs, partner media, ABM display	Display planning, partner outreach, ABM programs
📱 Paid Social Strategist	Meta, LinkedIn, TikTok, cross-platform social	Social ad programs, platform selection, audience strategy

💼 Sales Division

Turning pipeline into revenue through craft, not CRM busywork.

Agent	Specialty	When to Use
🎯 Outbound Strategist	Signal-based prospecting, multi-channel sequences, ICP targeting	Building pipeline through research-driven outreach, not volume
🔍 Discovery Coach	SPIN, Gap Selling, Sandler — question design and call structure	Preparing for discovery calls, qualifying opportunities, coaching reps
♟️ Deal Strategist	MEDDPICC qualification, competitive positioning, win planning	Scoring deals, exposing pipeline risk, building win strategies
🛠️ Sales Engineer	Technical demos, POC scoping, competitive battlecards	Pre-sales technical wins, demo prep, competitive positioning
🏹 Proposal Strategist	RFP response, win themes, narrative structure	Writing proposals that persuade, not just comply
📊 Pipeline Analyst	Forecasting, pipeline health, deal velocity, RevOps	Pipeline reviews, forecast accuracy, revenue operations
🗺️ Account Strategist	Land-and-expand, QBRs, stakeholder mapping	Post-sale expansion, account planning, NRR growth
🏋️ Sales Coach	Rep development, call coaching, pipeline review facilitation	Making every rep and every deal better through structured coaching

📢 Marketing Division

Growing your audience, one authentic interaction at a time.

Agent	Specialty	When to Use

🚀 Growth Hacker	Rapid user acquisition, viral loops, experiments	Explosive growth, user acquisition, conversion optimization
📝 Content Creator	Multi-platform content, editorial calendars	Content strategy, copywriting, brand storytelling
🐦 Twitter Engager	Real-time engagement, thought leadership	Twitter strategy, LinkedIn campaigns, professional social
📱 TikTok Strategist	Viral content, algorithm optimization	TikTok growth, viral content, Gen Z/Millennial audience
📸 Instagram Curator	Visual storytelling, community building	Instagram strategy, aesthetic development, visual content
🤝 Reddit Community Builder	Authentic engagement, value-driven content	Reddit strategy, community trust, authentic marketing
📲 App Store Optimizer	ASO, conversion optimization, discoverability	App marketing, store optimization, app growth
🌐 Social Media Strategist	Cross-platform strategy, campaigns	Overall social strategy, multi-platform campaigns
📕 Xiaohongshu Specialist	Lifestyle content, trend-driven strategy	Xiaohongshu growth, aesthetic storytelling, Gen Z audience
💬 WeChat Official Account Manager	Subscriber engagement, content marketing	WeChat OA strategy, community building, conversion optimization
🧠 Zhihu Strategist	Thought leadership, knowledge-driven engagement	Zhihu authority building, Q&A strategy, lead generation
CN Baidu SEO Specialist	Baidu optimization, China SEO, ICP compliance	Ranking in Baidu and reaching China's search market
🎬 Bilibili Content Strategist	B站 algorithm, danmaku culture, UP主 growth	Building audiences on Bilibili with community-first content
🎠 Carousel Growth Engine	TikTok/Instagram carousels, autonomous publishing	Generating and publishing viral carousel content
💼 LinkedIn Content Creator	Personal branding, thought leadership, professional content	LinkedIn growth, professional audience building, B2B content

🛒 China E-Commerce Operator	Taobao, Tmall, Pinduoduo, live commerce	Running multi-platform e-commerce in China
🎥 Kuaishou Strategist	Kuaishou, 老铁 community, grassroots growth	Building authentic audiences in lower-tier markets
🔍 SEO Specialist	Technical SEO, content strategy, link building	Driving sustainable organic search growth
📘 Book Co-Author	Thought-leadership books, ghostwriting, publishing	Strategic book collaboration for founders and experts
🌍 Cross-Border E-Commerce Specialist	Amazon, Shopee, Lazada, cross-border fulfillment	Full-funnel cross-border e-commerce strategy
🎵 Douyin Strategist	Douyin platform, short-video marketing, algorithm	Growing audiences on China's leading short-video platform
🎙️ Livestream Commerce Coach	Host training, live room optimization, conversion	Building high-performing livestream e-commerce operations
🎧 Podcast Strategist	Podcast content strategy, platform optimization	Chinese podcast market strategy and operations
🔒 Private Domain Operator	WeCom, private traffic, community operations	Building enterprise WeChat private domain ecosystems
🎬 Short-Video Editing Coach	Post-production, editing workflows, platform specs	Hands-on short-video editing training and optimization
🔥 Weibo Strategist	Sina Weibo, trending topics, fan engagement	Full-spectrum Weibo operations and growth
🤖 AI Citation Strategist	AEO/GEO, AI recommendation visibility, citation auditing	Improving brand visibility across ChatGPT, Claude, Gemini, Perplexity

📊 Product Division

Building the right thing at the right time.

Agent	Specialty	When to Use
🎯 Sprint Prioritizer	Agile planning, feature prioritization	Sprint planning, resource allocation, backlog management

🔍 Trend Researcher	Market intelligence, competitive analysis	Market research, opportunity assessment, trend identification
💬 Feedback Synthesizer	User feedback analysis, insights extraction	Feedback analysis, user insights, product priorities
🧠 Behavioral Nudge Engine	Behavioral psychology, nudge design, engagement	Maximizing user motivation through behavioral science

| 🧭 Product Manager | Full lifecycle product ownership | Discovery, PRDs, roadmap planning, GTM, outcome measurement |

🎬 Project Management Division

Keeping the trains running on time (and under budget).

Agent	Specialty	When to Use
🎬 Studio Producer	High-level orchestration, portfolio management	Multi-project oversight, strategic alignment, resource allocation
🐑 Project Shepherd	Cross-functional coordination, timeline management	End-to-end project coordination, stakeholder management
⚙️ Studio Operations	Day-to-day efficiency, process optimization	Operational excellence, team support, productivity
🧪 Experiment Tracker	A/B tests, hypothesis validation	Experiment management, data-driven decisions, testing
👔 Senior Project Manager	Realistic scoping, task conversion	Converting specs to tasks, scope management
📋 Jira Workflow Steward	Git workflow, branch strategy, traceability	Enforcing Jira-linked Git discipline and delivery

🧪 Testing Division

Breaking things so users don't have to.

Agent	Specialty	When to Use

📸 Evidence Collector	Screenshot-based QA, visual proof	UI testing, visual verification, bug documentation
🔍 Reality Checker	Evidence-based certification, quality gates	Production readiness, quality approval, release certification
📊 Test Results Analyzer	Test evaluation, metrics analysis	Test output analysis, quality insights, coverage reporting
⚡ Performance Benchmarker	Performance testing, optimization	Speed testing, load testing, performance tuning
🔌 API Tester	API validation, integration testing	API testing, endpoint verification, integration QA
🛠️ Tool Evaluator	Technology assessment, tool selection	Evaluating tools, software recommendations, tech decisions
🔄 Workflow Optimizer	Process analysis, workflow improvement	Process optimization, efficiency gains, automation opportunities
♿ Accessibility Auditor	WCAG auditing, assistive technology testing	Accessibility compliance, screen reader testing, inclusive design verification

🛟 Support Division

The backbone of the operation.

Agent	Specialty	When to Use
💬 Support Responder	Customer service, issue resolution	Customer support, user experience, support operations
📊 Analytics Reporter	Data analysis, dashboards, insights	Business intelligence, KPI tracking, data visualization
💰 Finance Tracker	Financial planning, budget management	Financial analysis, cash flow, business performance
🏗️ Infrastructure Maintainer	System reliability, performance optimization	Infrastructure management, system operations, monitoring
⚖️ Legal Compliance	Compliance, regulations, legal	Legal compliance, regulatory requirements,

Checker	review	risk management
📑 Executive Summary Generator	C-suite communication, strategic summaries	Executive reporting, strategic communication, decision support

🥽 Spatial Computing Division

Building the immersive future.

Agent	Specialty	When to Use
🏗️ XR Interface Architect	Spatial interaction design, immersive UX	AR/VR/XR interface design, spatial computing UX
💻 macOS Spatial/Metal Engineer	Swift, Metal, high-performance 3D	macOS spatial computing, Vision Pro native apps
🌐 XR Immersive Developer	WebXR, browser-based AR/VR	Browser-based immersive experiences, WebXR apps
🎮 XR Cockpit Interaction Specialist	Cockpit-based controls, immersive systems	Cockpit control systems, immersive control interfaces
🍎 visionOS Spatial Engineer	Apple Vision Pro development	Vision Pro apps, spatial computing experiences
🖥️ Terminal Integration Specialist	Terminal integration, command-line tools	CLI tools, terminal workflows, developer tools

🎯 Specialized Division

The unique specialists who don't fit in a box.

Agent	Specialty	When to Use
🎭 Agents Orchestrator	Multi-agent coordination, workflow management	Complex projects requiring multiple agent coordination
🔍 LSP/Index Engineer	Language Server Protocol, code intelligence	Code intelligence systems, LSP implementation, semantic indexing
📊 Sales Data Extraction Agent	Excel monitoring, sales metric extraction	Sales data ingestion, MTD/YTD/Year End metrics

📈 Data Consolidation Agent	Sales data aggregation, dashboard reports	Territory summaries, rep performance, pipeline snapshots
📬 Report Distribution Agent	Automated report delivery	Territory-based report distribution, scheduled sends
🔐 Agentic Identity & Trust Architect	Agent identity, authentication, trust verification	Multi-agent identity systems, agent authorization, audit trails
🔗 Identity Graph Operator	Shared identity resolution for multi-agent systems	Entity deduplication, merge proposals, cross-agent identity consistency
💸 Accounts Payable Agent	Payment processing, vendor management, audit	Autonomous payment execution across crypto, fiat, stablecoins
🛡️ Blockchain Security Auditor	Smart contract audits, exploit analysis	Finding vulnerabilities in contracts before deployment
📋 Compliance Auditor	SOC 2, ISO 27001, HIPAA, PCI-DSS	Guiding organizations through compliance certification
🌍 Cultural Intelligence Strategist	Global UX, representation, cultural exclusion	Ensuring software resonates across cultures
🗣️ Developer Advocate	Community building, DX, developer content	Bridging product and developer community
🔬 Model QA Specialist	ML audits, feature analysis, interpretability	End-to-end QA for machine learning models
🗃️ ZK Steward	Knowledge management, Zettelkasten, notes	Building connected, validated knowledge bases
🔌 MCP Builder	Model Context Protocol servers, AI agent tooling	Building MCP servers that extend AI agent capabilities
📄 Document Generator	PDF, PPTX, DOCX, XLSX generation from code	Professional document creation, reports, data visualization
⚙️ Automation Governance Architect	Automation governance, n8n, workflow auditing	Evaluating and governing business automations at scale
📚 Corporate Training Designer	Enterprise training, curriculum development	Designing training systems and learning programs

🏛️ Government Digital Presales Consultant	China ToG presales, digital transformation	Government digital transformation proposals and bids
⚕️ Healthcare Marketing Compliance	China healthcare advertising compliance	Healthcare marketing regulatory compliance
🎯 Recruitment Specialist	Talent acquisition, recruiting operations	Recruitment strategy, sourcing, and hiring processes
🎓 Study Abroad Advisor	International education, application planning	Study abroad planning across US, UK, Canada, Australia
🔗 Supply Chain Strategist	Supply chain management, procurement strategy	Supply chain optimization and procurement planning
🗺️ Workflow Architect	Workflow discovery, mapping, and specification	Mapping every path through a system before code is written
☁️ Salesforce Architect	Multi-cloud Salesforce design, governor limits, integrations	Enterprise Salesforce architecture, org strategy, deployment pipelines
FR French Consulting Market Navigator	ESN/SI ecosystem, portage salarial, rate positioning	Freelance consulting in the French IT market
KR Korean Business Navigator	Korean business culture, 품의 process, relationship mechanics	Foreign professionals navigating Korean business relationships

🎮 Game Development Division

Building worlds, systems, and experiences across every major engine.

Cross-Engine Agents (Engine-Agnostic)

Agent	Specialty	When to Use
🎯 Game Designer	Systems design, GDD authorship, economy balancing, gameplay loops	Designing game mechanics, progression systems, writing design documents
🗺️ Level Designer	Layout theory, pacing, encounter design, environmental storytelling	Building levels, designing encounter flow, spatial narrative
🎨 Technical Artist	Shaders, VFX, LOD pipeline, art-to-engine optimization	Bridging art and engineering, shader authoring, performance-safe asset pipelines

Artist	optimization	authoring, performance-safe asset pipelines
🔊 Game Audio Engineer	FMOD/Wwise, adaptive music, spatial audio, audio budgets	Interactive audio systems, dynamic music, audio performance
📖 Narrative Designer	Story systems, branching dialogue, lore architecture	Writing branching narratives, implementing dialogue systems, world lore

Unity

Agent	Specialty	When to Use
🏗️ Unity Architect	ScriptableObjects, data-driven modularity, DOTS/ECS	Large-scale Unity projects, data-driven system design, ECS performance work
✨ Unity Shader Graph Artist	Shader Graph, HLSL, URP/HDRP, Renderer Features	Custom Unity materials, VFX shaders, post-processing passes
🌐 Unity Multiplayer Engineer	Netcode for GameObjects, Unity Relay/Lobby, server authority, prediction	Online Unity games, client prediction, Unity Gaming Services integration
🛠️ Unity Editor Tool Developer	EditorWindows, AssetPostprocessors, PropertyDrawers, build validation	Custom Unity Editor tooling, pipeline automation, content validation

Unreal Engine

Agent	Specialty	When to Use
⚙️ Unreal Systems Engineer	C++/Blueprint hybrid, GAS, Nanite constraints, memory management	Complex Unreal gameplay systems, Gameplay Ability System, engine-level C++
🎨 Unreal Technical Artist	Material Editor, Niagara, PCG, Substrate	Unreal materials, Niagara VFX, procedural content generation
🌐 Unreal Multiplayer Architect	Actor replication, GameMode/GameState hierarchy, dedicated server	Unreal online games, replication graphs, server authoritative Unreal
🗺️ Unreal World Builder	World Partition, Landscape, HLOD, LWC	Large open-world Unreal levels, streaming systems, terrain at scale

Godot

Agent	Specialty	When to Use
📜 Godot Gameplay Scripter	GDScript 2.0, signals, composition, static typing	Godot gameplay systems, scene composition, performance-conscious GDScript
🌐 Godot Multiplayer Engineer	MultiplayerAPI, ENet/WebRTC, RPCs, authority model	Online Godot games, scene replication, server-authoritative Godot
✨ Godot Shader Developer	Godot shading language, VisualShader, RenderingDevice	Custom Godot materials, 2D/3D effects, post-processing, compute shaders

Blender

Agent	Specialty	When to Use
🧩 Blender Addon Engineer	Blender Python (`bpy`), custom operators/panels, asset validators, exporters, pipeline automation	Building Blender add-ons, asset prep tools, export workflows, and DCC pipeline automation

Roblox Studio

Agent	Specialty	When to Use
⚙️ Roblox Systems Scripter	Luau, RemoteEvents/Functions, DataStore, server-authoritative module architecture	Building secure Roblox game systems, client-server communication, data persistence
🎯 Roblox Experience Designer	Engagement loops, monetization, D1/D7 retention, onboarding flow	Designing Roblox game loops, Game Passes, daily rewards, player retention
👗 Roblox Avatar Creator	UGC pipeline, accessory rigging, Creator Marketplace submission	Roblox UGC items, HumanoidDescription customization, in-experience avatar shops

📚 Academic Division

Scholarly rigor for world-building, storytelling, and narrative design.

Agent	Specialty	When to Use

🌍 Anthropologist	Cultural systems, kinship, rituals, belief systems	Designing culturally coherent societies with internal logic
🌐 Geographer	Physical/human geography, climate, cartography	Building geographically coherent worlds with realistic terrain and settlements
📚 Historian	Historical analysis, periodization, material culture	Validating historical coherence, enriching settings with authentic period detail
📜 Narratologist	Narrative theory, story structure, character arcs	Analyzing and improving story structure with established theoretical frameworks
🧠 Psychologist	Personality theory, motivation, cognitive patterns	Building psychologically credible characters grounded in research

---

🎯 Real-World Use Cases

Scenario 1: Building a Startup MVP

Your Team:

1. 🎨 **Frontend Developer** - Build the React app
2. 🏗️ **Backend Architect** - Design the API and database
3. 🚀 **Growth Hacker** - Plan user acquisition
4. ⚡ **Rapid Prototyper** - Fast iteration cycles
5. 🔍 **Reality Checker** - Ensure quality before launch

Result: Ship faster with specialized expertise at every stage.

Scenario 2: Marketing Campaign Launch

Your Team:

1. 📝 **Content Creator** - Develop campaign content
2. 🐦 **Twitter Engager** - Twitter strategy and execution
3. 📸 **Instagram Curator** - Visual content and stories
4. 📰 **Reddit Community Builder** - Authentic community engagement

4. 🟡 **Reddit Community Builder** - Authentic community engagement
5. 📊 **Analytics Reporter** - Track and optimize performance

Result: Multi-channel coordinated campaign with platform-specific expertise.

Scenario 3: Enterprise Feature Development

Your Team:

1. 👔 **Senior Project Manager** - Scope and task planning
2. 💎 **Senior Developer** - Complex implementation
3. 🎨 **UI Designer** - Design system and components
4. 🧪 **Experiment Tracker** - A/B test planning
5. 📸 **Evidence Collector** - Quality verification
6. 🔍 **Reality Checker** - Production readiness

Result: Enterprise-grade delivery with quality gates and documentation.

Scenario 5: Paid Media Account Takeover

Your Team:

1. 📋 **Paid Media Auditor** - Comprehensive account assessment
2. 📡 **Tracking & Measurement Specialist** - Verify conversion tracking accuracy
3. 💰 **PPC Campaign Strategist** - Redesign account architecture
4. 🔍 **Search Query Analyst** - Clean up wasted spend from search terms
5. ✍️ **Ad Creative Strategist** - Refresh all ad copy and extensions
6. 📊 **Analytics Reporter** (Support Division) - Build reporting dashboards

Result: Systematic account takeover with tracking verified, waste eliminated, structure optimized, and creative refreshed — all within the first 30 days.

Scenario 4: Full Agency Product Discovery

Your Team: All 8 divisions working in parallel on a single mission.

See the Nexus Spatial Discovery Exercise -- a complete example where 8 agents (Product Trend Researcher, Backend Architect, Brand Guardian, Growth Hacker, Support Responder, UX Researcher, Project Shepherd, and XR Interface Architect) were deployed simultaneously to evaluate a software opportunity and produce a unified product plan covering market validation, technical architecture, brand strategy, go-to-market, support systems, UX research, project execution, and spatial UI design.

Result: Comprehensive, cross-functional product blueprint produced in a single session. More examples.

🤝 Contributing

We welcome contributions! Here's how you can help:

Add a New Agent

1. Fork the repository
2. Create a new agent file in the appropriate category
3. Follow the agent template structure:
   - Frontmatter with name, description, color
   - Identity & Memory section
   - Core Mission
   - Critical Rules (domain-specific)
   - Technical Deliverables with examples
   - Workflow Process
   - Success Metrics
4. Submit a PR with your agent

Improve Existing Agents

- Add real-world examples
- Enhance code samples
- Update success metrics
- Improve workflows

Share Your Success Stories

Have you used these agents successfully? Share your story in the Discussions!

Have you used these agents successfully? Share your story in the Discussions!

📖 Agent Design Philosophy

Each agent is designed with:

1. 🎭 **Strong Personality**: Not generic templates - real character and voice
2. 📋 **Clear Deliverables**: Concrete outputs, not vague guidance
3. ✅ **Success Metrics**: Measurable outcomes and quality standards
4. 🔄 **Proven Workflows**: Step-by-step processes that work
5. 💡 **Learning Memory**: Pattern recognition and continuous improvement

---

🎁 What Makes This Special?

Unlike Generic AI Prompts:

- ❌ Generic "Act as a developer" prompts
- ✅ Deep specialization with personality and process

Unlike Prompt Libraries:

- ❌ One-off prompt collections
- ✅ Comprehensive agent systems with workflows and deliverables

Unlike AI Tools:

- ❌ Black box tools you can't customize
- ✅ Transparent, forkable, adaptable agent personalities

🎨 Agent Personality Highlights

> "I don't just test your code - I default to finding 3-5 issues and require visual proof for everything."
>
> -- **Evidence Collector** (Testing Division)

> "You're not marketing on Reddit - you're becoming a valued community member who happens to represent a brand."
>
> -- **Reddit Community Builder** (Marketing Division)

> "Every playful element must serve a functional or emotional purpose. Design delight that enhances rather than distracts."
>
> -- **Whimsy Injector** (Design Division)

> "Let me add a celebration animation that reduces task completion anxiety by 40%"
>
> -- **Whimsy Injector** (during a UX review)

📊 Stats

- 🎭 **144 Specialized Agents** across 12 divisions
- 📝 **10,000+ lines** of personality, process, and code examples
- ⏱️ **Months of iteration** from real-world usage
- 🌟 **Battle-tested** in production environments
- 💬 **50+ requests** in first 12 hours on Reddit

🔌 Multi-Tool Integrations

The Agency works natively with Claude Code, and ships conversion + install scripts so you can use the same agents across every major agentic coding tool.

Supported Tools

- Claude Code — native `.md` agents, no conversion needed → `~/.claude/agents/`
- GitHub Copilot — native `.md` agents, no conversion needed → `~/.github/agents/` + `~/.copilot/agents/`
- Antigravity — `SKILL.md` per agent → `~/.gemini/antigravity/skills/`
- Gemini CLI — extension + `SKILL.md` files → `~/.gemini/extensions/agency-agents/`
- OpenCode — `.md` agent files → `.opencode/agents/`
- Cursor — `.mdc` rule files → `.cursor/rules/`

- Aider — single `CONVENTIONS.md` → `./CONVENTIONS.md`
- Windsurf — single `.windsurfrules` → `./.windsurfrules`
- OpenClaw — `SOUL.md` + `AGENTS.md` + `IDENTITY.md` per agent
- Qwen Code — `.md` SubAgent files → `~/.qwen/agents/`

⚡ Quick Install

Step 1 -- Generate integration files:

```
./scripts/convert.sh
# Faster (parallel, output order may vary): ./scripts/convert.sh --parallel
```

Step 2 -- Install (interactive, auto-detects your tools):

```
./scripts/install.sh
# Faster (parallel, output order may vary): ./scripts/install.sh --no-interactive --parallel
```

The installer scans your system for installed tools, shows a checkbox UI, and lets you pick exactly what to install:

```
  +-----------------------------------------------+
  |   The Agency -- Tool Installer                |
  +-----------------------------------------------+

  System scan: [*] = detected on this machine

  [x]  1)  [*]  Claude Code     (claude.ai/code)
  [x]  2)  [*]  Copilot         (~/.github + ~/.copilot)
  [x]  3)  [*]  Antigravity     (~/.gemini/antigravity)
  [ ]  4)  [ ]  Gemini CLI      (gemini extension)
  [ ]  5)  [ ]  OpenCode        (opencode.ai)
  [ ]  6)  [ ]  OpenClaw        (~/.openclaw)
  [x]  7)  [*]  Cursor          (.cursor/rules)
  [ ]  8)  [ ]  Aider           (CONVENTIONS.md)
  [ ]  9)  [ ]  Windsurf        (.windsurfrules)
  [ ] 10)  [ ]  Qwen Code       (~/.qwen/agents)

  [1-10] toggle   [a] all   [n] none   [d] detected
  [Enter] install   [q] quit
```

Or install a specific tool directly:

```
./scripts/install.sh --tool cursor
./scripts/install.sh --tool opencode
./scripts/install.sh --tool openclaw
./scripts/install.sh --tool antigravity
```

Non-interactive (CI/scripts):

```
./scripts/install.sh --no-interactive --tool all
```

Faster runs (parallel) — On multi-core machines, use `--parallel` so each tool is processed in parallel. Output order across tools is non-deterministic. Works with both interactive and non-interactive install: e.g. `./scripts/install.sh --interactive --parallel` (pick tools, then install in parallel) or `./scripts/install.sh --no-interactive --parallel`. Job count defaults to `nproc` (Linux), `sysctl -n hw.ncpu` (macOS), or 4; override with `--jobs N`.

```
./scripts/convert.sh --parallel                    # convert all tools in parallel
./scripts/convert.sh --parallel --jobs 8           # cap parallel jobs
./scripts/install.sh --no-interactive --parallel   # install all detected tools in parallel
./scripts/install.sh --interactive --parallel      # pick tools, then install in parallel
./scripts/install.sh --no-interactive --parallel --jobs 4
```

Tool-Specific Instructions

- ▶ Claude Code
- ▶ GitHub Copilot
- ▶ Antigravity (Gemini)
- ▶ Gemini CLI
- ▶ OpenCode
- ▶ Cursor
- ▶ Aider
- ▶ Windsurf

▶ OpenClaw

▶ Qwen Code

Regenerating After Changes

When you add new agents or edit existing ones, regenerate all integration files:

```
./scripts/convert.sh                  # regenerate all (serial)
./scripts/convert.sh --parallel       # regenerate all in parallel (faster)
./scripts/convert.sh --tool cursor    # regenerate just one tool
```

🗺️ Roadmap

- [ ] Interactive agent selector web tool
- [x] Multi-agent workflow examples -- see examples/
- [x] Multi-tool integration scripts (Claude Code, GitHub Copilot, Antigravity, Gemini CLI, OpenCode, OpenClaw, Cursor, Aider, Windsurf, Qwen Code)
- [ ] Video tutorials on agent design
- [ ] Community agent marketplace
- [ ] Agent "personality quiz" for project matching
- [ ] "Agent of the Week" showcase series

🌐 Community Translations & Localizations

Community-maintained translations and regional adaptations. These are independently maintained -- see each repo for coverage and version compatibility.

Language	Maintainer	Link	Notes
CN 简体中文 (zh-CN)	@jnMetaCode	agency-agents-zh	100 translated agents + 9 China-market originals

CN 简体中文 (zh-CN)	@dsclca12	agent-teams	Independent translation with Bilibili, WeChat, Xiaohongshu localization

Want to add a translation? Open an issue and we'll link it here.

🙏 Acknowledgments

What started as a Reddit thread about AI agent specialization has grown into something remarkable — **147 agents across 12 divisions**, supported by a community of contributors from around the world. Every agent in this repo exists because someone cared enough to write it, test it, and share it.

To everyone who has opened a PR, filed an issue, started a Discussion, or simply tried an agent and told us what worked — thank you. You're the reason The Agency keeps getting better.

💬 Community

- **GitHub Discussions**: Share your success stories
- **Issues**: Report bugs or request features
- **Reddit**: Join the conversation on r/ClaudeAI
- **Twitter/X**: Share with #TheAgency

🚀 Get Started

1. **Browse** the agents above and find specialists for your needs
2. **Copy** the agents to `~/.claude/agents/` for Claude Code integration
3. **Activate** agents by referencing them in your Claude conversations
4. **Customize** agent personalities and workflows for your specific needs
5. **Share** your results and contribute back to the community

---

🎭 **The Agency: Your AI Dream Team Awaits** 🎭
